Rain Gutter for Pop-up Tents

Gutter between two connected BRIMO pop-up tents

Gutter between two tents

A U-shaped gutter that collects the rain running between two pop-up tents set up next to each other and drains it away. Together the tents create one larger covered area.

Lengths	2 m · 4.5 m (for 4 m and 4.5 m sides) · 6 m
Material	polyester with PVC coating
Fastening	5 cm wide Velcro
Compatibility	BRIMO pop-up tents

Package contents

- 1 rain gutter

Installation and use

1. **Set up both tents**
   Open, lock and anchor both tents next to each other so that the roof edges are close together and the legs stand side by side.
2. **Same height**
   Set both tents to the same leg height.
3. **Attach the first side**
   Press one Velcro strip of the gutter onto the Velcro along the roof edge of the first tent along its full length.
4. **Attach the second side**
   Press the second Velcro strip onto the roof edge of the second tent. The gutter now hangs in a U shape between the tents.
5. **Check the drainage**
   Make sure the water can run out at the ends of the gutter and does not drip into the tents.

Water drains away at the end

⚠ Safety instructions

For this product

- Do not let water collect in the gutter or on the roofs – remove it immediately. Accumulated water is heavy and can damage the frames.
- Each tent must be anchored separately. Take both tents down in strong wind or storm.
- Do not lean on, hang on or put objects in the gutter.

General

- Always anchor the tent properly (weights, sand or water bags, pegs or ropes) before use.
- Take the tent and its accessories down before strong wind, storm, heavy rain, snow or hail. Never leave them installed unattended or overnight in bad weather.
- Never let rain water collect on the roof or any fabric part – remove accumulated water immediately and keep all fabric fully tensioned so water runs off.
- Keep children away during installation and do not let them play with the parts.
- Check all parts before every use and replace damaged parts. Use only original BRIMO parts.

Care and storage

- Clean with water and let the gutter dry completely before packing.

The manufacturer is not liable for damage caused by wind, rain, snow, accumulated water, insufficient anchoring or by not following these instructions.
